

GET A \$150,000 GRANT TO BOOST YOUR BUSINESS TECHNOLOGY

Benefit from the Digital Modernization and Adoption Plan to get advice on technologies that can help your business. Benchmark your business technology against human capital, in alignment with your business objectives and get a detailed plan to improve your overall productivity.

Get money and expertise to transform your business

Do you own a small or medium-sized Canadian business? We can help. Get a grant and access to expert advice to increase online sales, reduce costs, better manage inventory and more.

What is The DMAP?

The Digitalization Competence Centre (DCC) is Ontario's knowledge centre focused on driving the digital modernization of Ontario SMEs by:

- Supporting digital literacy through education, coaching and training to help SMEs understand the benefits of digital adoption and supporting them in the development of a Digital Modernization and Adoption Plan (DMAP) for their company
- Accelerating digital adoption by providing SMEs with support to adopt new equipment and processes through the Technology Demonstration Program
- Enhancing technological capacity in both companies and sectors that have the potential for further digitization
- Supporting the commercialization of Made-in-Ontario technologies by connecting companies looking to adopt digital technologies with Ontario technology firms

[CHECK MY ELIGIBILITY](#)

-  You are incorporated federally or provincially, or a Canadian resident sole proprietor.
-  SMEs with at least \$500,000 of annual revenue in one of the last three tax years
-  You are a for-profit, privately owned company.
-  You have between 1 - 499 full-time employees.

Use The DMAP Grant to Get an Action Plan to Improve Your Business Technology

Our reports are designed to help your stakeholders fully understand your process gaps and technology risks and provide step-by-step remediations to improve productivity.

-  **Executive Summary** High level overview of your process and technology gaps, recommendations and risk management implications in a clear non-technical language. *Suited for non-technical stakeholders.*
-  **Gaps & Recommendations** Gaps prioritized by revenue leakage including technical evidence (screenshots, requests, etc.) and recommendations to find technology in alignment with business objectives. *Suited for your management team.*
-  **Final Report** This document will allow you to meet compliance and regulatory reporting requirements efficiently and with minimal overhead. *Suited for DMAP funding (including OCI grant and BDC loan).*

Digital Adoption Ideas

While the possibilities are as diverse as you and your business, some examples of solution recommendations you might benefit from could include:

- Data transparency and data visualization for actionable insights into your organization
- Customer relationship management system for personalized connections for higher conversion
- Enterprise resource planning system for operational efficiency and interdepartmental communications
- Financial accountability through transparency in accounting operations (cloud-based technologies)
- Custom app development for truly specialized industry functional expertise
- API integration for connectivity between departmental for a truly holistic approach to business operations
- Business automation to minimize manual labour and increase productivity
- Cyber security awareness and prevention to minimize risk to operations

DMAP helps SMEs with the development of an effective digital strategy and digital technology adoption plan in order to help them transform and grow. As such, eligible SMEs receive up to \$15,000 in reimbursement funds to develop a digital adoption plan. The grant covers the cost of retaining the services of an approved Digital Adoption Consultant (DAC). All clients selected for DMAP grant will need to contract with an eligible Digital Adoption Consultant registered on the DCC roster to develop their Digital Modernization and Adoption Plan (DMAP) and will need to submit their completed plan.

If you're interested in learning more about this, Change Connect is an approved CDAP Digital Advisor and can help you apply for the grant if your business qualifies and can build your Digital Adoption Plan.
