Forces

# ***Our Mission***

*“We help businesses with assessing infrastructure and business needs, designing IT solutions, deployment of new technologies, and provide on-going support, so organizations can focus on business-critical tasks.”*

# *Our Services*

- *Managed Services*
- *Cloud Enablement*
- *Cyber Security*
- *Business Continuity and Disaster Recovery*
- *CDAP – Business technology grant*

# Managed Services

Having a well-organized technical support system that operates 24/7 is crucial. We provide the necessary technical expertise, whenever needed, to keep your infrastructure running smoothly.

- System Support
- Security & Network Operations
- Monitoring & Alert Systems
- User Support

# Cloud Enablement

With cloud services, businesses can access their data at any time. Streamlined operations and processes, faster application development, increased productivity and cost efficiency, and less time and money spent on infrastructure maintenance.

- Cloud Vendor Selection
- Roadmap
- Operational Management
- Cloud-Native Capabilities
- Scalability

# Cyber Security

The risk of cyber threats has made it critical for companies to protect their intellectual property and business systems. Cloud Forces offers a multilayered solution that meets various corporate compliance and risk tolerance objectives.

- Threat Management
- Endpoint Protection
- Event Management
- Security Operations Centre
- Develop your Security Policy
- Communicate and Enforce
- Security Education

# ***Business Continuity & Disaster Recovery***

Our Disaster Recovery Service offers a cloud-based platform with a business continuity plan in the case of potential issues arising. This service provides the necessary technology and expertise to restore IT systems to their previous condition.

- Assessment
- Solution Design
- Onboarding
- Managed Monitoring & Recovery
- Maintenance & Testing
